DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-20 and 22-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Zech *et al.* (WO 01/17483). For the purpose of examination, Zech *et al.* (US 6,894,144) was used as the English translation of Zech *et al.* (WO 01/17483).

Regarding claim 15: Zech *et al.* teaches a composition (1:10-11) comprising a mixture of N-alkylaziridino compounds (5:56-62), wherein N-alkylaziridino compounds have aziridino equivalent masses being able to be varied from 500 to 25000 g/equivalent and the number of N-alkylaziridino groups being able to be varied between 1 {corresponding to instant formula Z2} and 4, wherein preferred embodiments contain at least 2, or at least 3 aziridino groups {corresponding to instant formula Z1} (6:53-64), wherein the compounds have different polymer backbones (6:65-7:4).

Regarding claim 16-18: Zech *et al.* teaches N-alkylaziridino polyethers {corresponding to Z1 and Z2} [instant claim 16 and 18] comprising tetrahydrofuran units [instant claim 17] (7:1-4).

Art Unit: 1796

Regarding claim 19: Zech *et al.* teaches N-alkylaziridino polyethers having a mass of at least 500 {based on 500 to 25000 g/equivalent and the number of N-alkylaziridino groups being 1 {corresponding to instant formula Z2} (6:53-57).

Regarding claim 20: Zech et al. teaches additives (5:44-6:2; 6:16-19; 6:36-42).

Regarding claim 22: Zech *et al*. teaches a base component comprising N-alkylaziridino compounds {corresponding to Z1 and Z2} and a catalyst component {corresponding to instant formula K} (5:44-6:2).

Regarding claim 23: Zech et al. teaches a dental material (1:12-15; 1:55-59, 7:45-50).

The Office realizes that all the claimed effects or physical properties are not positively stated by the reference. However, the reference teaches all of the claimed reagents. Therefore, the claimed effects and physical properties, i.e. a Shore A hardness within 20 minutes of mixing base and catalyst at room temperature of at least 80% of the Shore A hardness reached after 24 h, would inherently be achieved by a composition with all the claimed ingredients. If it is the applicants' position that this would not be the case: (1) evidence would need to be presented to support applicant's position; and (2) it would be the Office's position that the application contains inadequate disclosure that there is no teaching as to how to obtain the claimed properties and effects with only the claimed ingredients.

Regarding claim 24: Zech et al. teaches dental impression materials (1:10-15).

Regarding claim 25: Zech *et al.* teaches the number of N-alkylaziridino groups equal to 1 {corresponding to instant formula Z2} (6:53-57).

The Office realizes that all the claimed effects or physical properties are not positively stated by the reference. However, the reference teaches all of the claimed reagents. Therefore,

the claimed effects and physical properties, i.e. an acceleration of the setting rate, would inherently be achieved by a composition with all the claimed ingredients. If it is the applicants' position that this would not be the case: (1) evidence would need to be presented to support applicant's position; and (2) it would be the Office's position that the application contains inadequate disclosure that there is no teaching as to how to obtain the claimed properties and effects with only the claimed ingredients.

Regarding claims 26-27: Zech *et al.* teaches pre-dosed pack units of base and catalyst {a kit}, and double chambered cartridges {base and catalyst separated} [instant claim 26] with static mixing tube [instant claim 27] (6:3-5; 6:53-57).

Claim 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Zech *et al.* (WO 01/17483). For the purpose of examination, Zech *et al.* (US 6,894,144) was used as the English translation of Zech *et al.* (WO 01/17483).

Regarding claim 21: Zech *et al.* teaches a method of preparing a composition (1:10-11) comprising a mixture of N-alkylaziridino compounds (5:56-62), wherein N-alkylaziridino compounds have aziridino equivalent masses being able to be varied from 500 to 25000 g/equivalent and the number of N-alkylaziridino groups being able to be varied between 1 {corresponding to instant formula Z2} and 4, wherein preferred embodiments contain at least 2, or at least 3 aziridino groups {corresponding to instant formula Z1} (6:53-64), wherein the compounds have different polymer backbones (6:65-7:4).

The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. See attached form PTO-892.

Correspondence

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to MICHAEL PEPITONE whose telephone number is (571)270-

3299. The examiner can normally be reached on M-F, 7:30-5:00 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Mark Eashoo can be reached on 571-272-1197. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
